GREEN ENERGY 2011 - EUROPE DAYS 2011

5-6-7-8th MAY 2011

IN CONJUNCTION WITH THE GREEN ENERGY EVENTS THE 2ND EDITION OF THE EUROPEAN MARKET WILL TAKE PLACE IN THE CESENA CITY CENTRE

The Municipality of Cesena signed up the Covenant of Mayors, undertaking to design a Sustainable Energy Action Plan to reduce the CO₂ emission, the energy consumption within the 2020 and to increase the renewable energy sources production.

On the occasion of the Europe Days 2011, we are glad to present to citizens the Sustainable Energy Action Plan, developed with the contribution of local stakeholders and together with the collaboration of Romagna Innovazione and the think tank Antares.

Our city is involved in the European policies to present climate change and is implementing operational tools such as the Sustainable Energy Action Plan and European projects. We are at the forefront and we want to give our contribution to the big challenge of our era.
